Data center and cloud computing have been used to build most of the large-scale Internet applications, such as Google search and Facebook. This conference brings together experts to advance the state-of-the-art technologies, exchange ideas, and foster strategic views in this area. Topics include data center networks, cloud architecture, security, resilience, performance, cloud applications, and future perspectives.

Convened by

Yousif Asfour
Chief Information Officer, NYUAD

Jonathan Chao
Department Head, Electrical & Computer Engineering, Polytechnic Institute of NYU

Torsten Suel
Associate Professor, Computer Science & Engineering, Polytechnic Institute of NYU

Kang Xi
Industry Associate Professor, Electrical & Computer Engineering, Polytechnic Institute of NYU

In collaboration with Injazat Data Systems and The Data Center and Cloud Computing Laboratory, NYUAD
