NYU Abu Dhabi is looking for outstanding faculty in all areas of Computer Science. One particular focus area for hiring this year is in Systems and Networking. Candidates who have experience designing and implementing operating systems, distributed systems, or networked systems are highly desired. Furthermore, candidates should have a passion for building real systems and mastery over systems-related issues such as scalability, security, or reliability, and should have a track record of choosing ambitious research projects that have high potential impact. Successful candidates will find a congenial research environment that includes supportive and highly motivated colleagues, access to significant resources, a competitive startup package, and broad opportunities for joint research across the different campuses of the NYU system. Interested researchers will also have the opportunity to join the newly formed Center for Technology and Economic Development and the Data Center and Computing Laboratory, to participate in large-scale projects underway in Abu Dhabi and sub-Saharan Africa.

New York University has established itself as a Global Network University, a multi-site, organically connected network encompassing key global cities and idea capitals. The network has three degree-granting campuses - New York, Shanghai, and Abu Dhabi - complemented by 12 additional academic centers across five continents. Faculty and students will circulate within the network in pursuit of common research interests and cross-cultural, interdisciplinary endeavors, both local and global.

Entering its third year, NYU Abu Dhabi has recruited a cohort of faculty who are at once distinguished in their research and teaching. Our students are drawn from around the world and surpass all traditional recruitment benchmarks, both US and global. NYU Abu Dhabi’s highly selective liberal arts enterprise is complemented by an institute for advanced research, sponsoring cutting-edge projects across the Arts, Humanities, Social Sciences, Sciences, and Engineering.

The terms of employment are highly competitive and include housing and educational subsidies for children. Faculty may also spend time at NYU New York and other sites of the global network, engaging in both research and teaching opportunities. Appointments can begin as soon as September 1, 2013, but candidates may elect to start as late as September 1, 2014.

Applications are due by January 15, 2013; however, applications received later will be reviewed until the positions are filled. Candidates should submit a curriculum vitae, statements of teaching and research interests (not to exceed three pages each), no more than three representative publications and three letters of reference in PDF format to be considered. Please visit our website at http://nyuad.nyu.edu/human.resources/open.positions.html for instructions and other information on how to apply. If you have any questions, please e-mail nyuad.science@nyu.edu.

NYU Abu Dhabi is an Equal Opportunity/Affirmative Action Employer.
